Q8:- # عدد كل حرف ضع علامة ب
 8- A text file named "matter.txt" contains some text, which needs to be displayed such that every next character is separated by a symbol "#". Write a function definition for hash_display() in Python that would display the entire content of the file in the desired format.

Example :

If the file history.txt has the following content stored in it :

THE WORLD IS ROUND

The function hash_display() should display the following content :

T#H#E# #W#O#R#L#D# #I#S# #R#O#U#N#D#
