حل واجبات ال PYTHON

If statement exercises

- ☐ Write an if statement that asks for the user's name via input() function. If the name is "Bond" make it print "Welcome on board 007." Otherwise make it print "Good morning NAME". (Replace Name with user's name)
- ☐ Write an if statement that asks for the user's name via input() function and print True if a number is even and otherwise print False.
- ☐ Write a Python program to find those numbers which are divisible by 7 and multiple of 5, between 1500 and 2700 (both included).
- ☐ Write a Python program to find those numbers which are divisible by 7 or multiple of 5, between 1500 and 2700 (both included).
- ☐ Write a Python program that accepts a word from the user and reverse it.

```
#Q1/H.W/Write an if statement that asks for the user's name via input()
#function. If the name is "Bond" make it print "Welcome on
#board 007." Otherwise make it print "Good morning NAME".
#(Replace Name with user's name)
```

```
username = input("Enter Your Name : ")
if username == 'Bond':
    print("Welcome on board 007.")
else:
    print("Good morning",username)
```

```
